DETAILED ACTION

BEST AVAILABLE COPY

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7 are, drawn to unconsolidated surface material, classified in class 428, subclass 403⁺.
 - II. Claims 9-14 and 16-20 are, drawn to a method of preparing colored rubber particles, classified in class 427, subclass 214⁺.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as color coating unconsolidated vulcanized rubber particles either with dry pigment or dye in a mixer or with an organic dispersion of pigment or dye in an organic solvent, followed by drying and adding an emulsion polymer to said color coated vulcanized rubber particles to form a protective film around said color coated vulcanized rubber particles.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
